INDEX OF AUTHORS

Volume II—TRANSACTIONS of American Society for Steel Treating
1921-1922

| | | | |
|----------------------|------|---------------------|------|
| B | | | |
| Baldwin, J. P. | 1034 | Jeffries, Zay | 514 |
| Barker, E. H. | 1039 | Johnson, C. M. | 501 |
| Bellis, A. E. | 398 | Johnson, J. B. | 1167 |
| Bird, R. M. | 1213 | Johnson, W. George | 467 |
| Blue, A. A. | 430 | Jominy, W. E. | 206 |
| Bowman, Dr. J. G. | 896 | K | |
| Bowman, L. D. | 184 | Knowlton, H. B. | 1155 |
| Bristol, William H. | 339 | Kommers, J. B. | 305 |
| Brooks, Charles A. | 72 | L | |
| Brophy, G. R. | 384 | Langenberg, F. C. | 763 |
| Burgess, G. K. | 91 | Leary, H. F. | 288 |
| C | | Lessells, J. M. | 659 |
| Campbell, C. M. | 495 | Little, G. M. | 228 |
| Campbell, E. D. | 269 | Loebell, H. O. | 240 |
| Chapin, W. R. | 507 | M | |
| Conner, William G. | 148 | Manchester, H. H. | 623 |
| Cowdrey, Irving H. | 802 | Mathews, J. A. | 990 |
| Cox, A. M. | 680 | McCormick, G. C. | 1006 |
| Crosby, V. A. | 441 | McGahey, W. E. | 799 |
| Crowe, W. B. | 869 | McInerney, W. I. | 237 |
| D | | McIntosh, F. F. | 856 |
| Daniels, Samuel | 1167 | Merten, W. J. | 977 |
| d'Arcambal, A. H. | 586 | Moore, H. F. | 70 |
| d'Arcambal, A. H. | 1111 | Moore, H. F. | 305 |
| de Forest, A. V. | 387 | Morey, James B. | 63 |
| Dowdell, R. L. | 320 | P | |
| E | | Patterson, W. L. | 108 |
| Ehn, E. W. | 1177 | Pierce, E. W. | 426 |
| Emmons, J. V. | 1100 | Priestley, W. J. | 620 |
| Evans, F. J. | 213 | R | |
| F | | Rockwell, S. P. | 1013 |
| Freeland, H. G. | 898 | S | |
| French, H. J. | 409 | Schagrin, H. | 331 |
| French, H. J. | 467 | Schenck, R. B. | 1203 |
| French, H. J. | 769 | Selleck, Theo. G. | 705 |
| French, H. J. | 1125 | Selleck, Theo. G. | 1219 |
| G | | Shimer, E. B. | 403 |
| Gann, J. A. | 607 | Shimer, P. W. | 403 |
| Gill, J. P. | 184 | Spalding, S. C. | 950 |
| Green, A. W. F. | 274 | Spillane, Richard | 602 |
| Grossmann, Marcus A. | 691 | Succop, John A. | 673 |
| Grossmann, Marcus A. | 1001 | Strauss, Jerome | 1125 |
| H | | Styri, Haakon | 718 |
| Hadfield, Sir Robt. | 396 | T | |
| Hall, R. G. | 561 | Townsend, Arthur S. | 133 |
| Harder, Oscar E. | 139 | V | |
| Hillman, V. E. | 296 | Vanick, J. S. | 323 |
| Hillman, V. E. | 369 | W | |
| Hoffman, N. B. | 516 | White, A. E. | 85 |
| Hyde, E. P. | 223 | White, A. E. | 323 |
| I | | White, Walter H. | 437 |
| Ipsen, C. L. | 984 | Wild, Lancelot W. | 696 |
| J | | Williams, J. H. G. | 391 |
| Janitzky, E. J. | 55 | Wood, Harold F. | 710 |
| Janitzky, E. J. | 377 | Wood, W. P. | 423 |
| | | Woodside, W. P. | 809 |

INDEX OF SUBJECTS AND AUTHORS OF PAPERS Volume II—TRANSACTIONS of American Society for Steel Treating October, 1921-September, 1922

A

| | |
|---|------|
| Abrasive Qualities of Plain Carbon and Alloy Steels— <i>A. M. Cox</i> | 680 |
| Discussion | 886 |
| Abstracts of Papers, List of Authors and Pages on Which They Appear..... | 32 |
| Abstracts of Papers Presented at Indianapolis Convention..... | 33 |
| Addresses Presented at Third Annual Convention..... | 170 |
| Aircraft; Study of Some Failures in Aircraft Plane and Engine Parts— <i>J. B. Johnson and S. Daniels</i> | 1167 |
| Alloy; A New Heat-Resisting Alloy—Calite— <i>G. R. Brophy</i> | 384 |
| Discussion | 569 |
| Alloy and Carbon Steels; Abrasive Qualities of— <i>A. M. Cox</i> | 680 |
| Discussion | 886 |
| Alloy Carbonizing Boxes—Do They Pay?— <i>C. M. Campbell</i> | 495 |
| Alloy Steels of High Elastic Limit; Their Heat Treatment and Microstructure— <i>C. M. Johnson</i> | 501 |
| Alloy Structural Steels at High Temperatures; Tensile Properties of— <i>H. J. French</i> | 409 |
| Alloys; Discussion of the Hardening of Steel and Other Alloys— <i>Oscar E. Harder</i> .. | 139 |
| Alloy Steels; Standardization of Methods Leading to Comparative Physical Properties of— <i>R. M. Bird</i> | 1213 |
| Annealing Overstrained Steel; Efficacy of— <i>Irving H. Cowdrey</i> | 802 |
| Annual Address of the President..... | 16 |
| Applications of Dowmetal— <i>J. A. Gann</i> | 607 |
| Atmospheres of Furnaces and Their Relation to the Formation of Scale— <i>G. C. McCormick</i> | 1006 |
| Automatic Compensation for Variations in Temperature of Cold Ends of Thermoelectric Pyrometers— <i>Wm. H. Bristol</i> | 339 |
| Automobiles; Selection of Steels for— <i>W. E. Jominy</i> | 206 |
| Automotive Circles; Reconnoitering in— <i>V. A. Crosby</i> | 441 |

B

| | |
|--|------|
| Ball Bearings; Heat Treatment of Chrome Steel for— <i>Haakon Styri</i> | 718 |
| Ball Steel— <i>H. G. Freeland</i> | 898 |
| Discussion | 911 |
| Bearings; Heat Treatment of Chrome Steels for Ball— <i>Haakon Styri</i> | 718 |
| Boiler Tube Steel; Occurrence of Oxides and Nitrides in— <i>A. E. White and J. S. Vanick</i> | 323 |
| Bolts; Cold-Headed Bolts, Their Metallography and Heat Treatment— <i>V. E. Hillman</i> | 369 |
| Discussion | 574 |
| Boxes; Do Alloy Carbonizing Boxes Pay?— <i>C. M. Campbell</i> | 495 |
| Breakdown Tests; Lathe Breakdown Tests of Some Modern High-Speed Tool Steels— <i>H. J. French and Jerome Strauss</i> | 1125 |
| Brinell Hardness Measurements on Small Specimens— <i>E. D. Campbell</i> | 269 |
| Buying Steel on Closer Carbon Limits— <i>E. W. Pierce</i> | 426 |

C

| | |
|--|-----|
| Calite—A New Heat-Resisting Alloy— <i>G. R. Brophy</i> | 384 |
| Discussion | 569 |
| Carbon and Alloy Steels; Abrasive Qualities of— <i>A. M. Cox</i> | 680 |
| Discussion | 886 |

| | |
|--|------------|
| Carbon Gears; Reclaiming of High Carbon Gears— <i>A. W. F. Green</i> | 274 |
| Carbon Limits; Buying Steel on Closer Carbon Limits— <i>E. W. Pierce</i> | 426 |
| Carbon-Molybdenum and a Chromium-Molybdenum Steel; Effect of Heat Treatment on Mechanical Properties of— <i>H. J. French</i> | 769 |
| Carbon Penetration; Comparison of Its Rate of Penetration in Commercial Steels Used for Carburizing— <i>S. C. Spalding</i> | 950 |
| Carbon Steel; Effect of Heat Treatment on the Mechanical Properties of one per cent Carbon Steel— <i>H. J. French and W. G. Johnson</i> | 467 |
| Carbon Steel Wire; Ghost Lines and Grain Elongations in Hot Rolled and Cold Drawn Low Carbon Steel Wire— <i>N. B. Hoffman</i> | 516 |
| Carbonizing; High Cost of— <i>T. G. Selleck</i> | 1219 |
| Carbonizing Boxes; Do Alloy Boxes Pay?— <i>C. M. Campbell</i> | 495 |
| Carbonizing of Cast Steel Parts— <i>Wm. G. Conner</i> | 148 |
| Carbonizing Process—Relation of Time and Temperature to Depth of Case— <i>T. G. Selleck</i> | 705 |
| Carbonizing with Wood Charcoal— <i>H. Schagrin</i> | 331 |
| Carburizing and Decarburizing in Case Hardening— <i>H. B. Knowlton</i> | 1155 |
| Carburizing; Comparison of Rate of Carbon Penetration in Commercial Steels— <i>S. C. Spalding</i> | 950 |
| Carburizing Heavy Sections— <i>W. I. McInerney</i> | 237 |
| Case Hardening— <i>A. H. d'Arcambal</i> | 1111 |
| Case Hardening; Irregularities in Case Hardened Work Caused by Improperly Made Steel— <i>E. W. Ehn</i> | 1177 |
| Case Hardening; Carburizing and Decarburizing in— <i>H. B. Knowlton</i> | 1155 |
| Case-Hardened Chain; Magnetic Testing of— <i>A. V. de Forest</i> | 387 |
| Discussion | 582 |
| Case-Hardening; Cyanamide in Liquid Case-Hardening— <i>P. W. Shimer and E. B. Shimer</i> | 403 |
| Cast Steel Parts; Carbonizing of— <i>Wm. G. Conner</i> | 148 |
| Castings; Heat Treatment of Steel— <i>W. H. White</i> | 437 |
| Change in Dimensions of High-Speed Steels in Heat Treatment— <i>M. A. Grossmann</i> Discussion | 691 890 |
| Charcoal; Carbonizing with Wood Charcoal— <i>H. Schagrin</i> | 331 |
| Chrome Steels for Ball Bearings; Heat Treatment of— <i>Haakon Styri</i> | 718 |
| Chromium-Molybdenum Steel; Effect of Heat Treatment on Mechanical Properties of a Carbon-Molybdenum and Chromium-Molybdenum Steel— <i>H. J. French</i> | 769 |
| Coiling and Heat Treating Plant for Helical Springs— <i>W. J. Merten</i> | 977 |
| Contribution to the Problem of the Influence of Mass in Heat Treatment— <i>E. J. Janitzky</i> | 55 |
| Convention at Indianapolis Sets New Record in Attendance and Number of Papers Presented | 3 |
| Convention; Abstracts of Papers Presented at Indianapolis..... | 33 |
| Convention; Addresses, presented at Third Annual Convention..... | 170 |
| Cooling and Heating of Steel; Importance of Proper— <i>J. A. Sycop</i> | 673 |
| Discussion | 888 |
| Cold Drawn and Hot Rolled Steel Wire, Ghost Lines and Grain Elongation in— <i>N. B. Hoffman</i> | 516 |
| Cold Ends of Thermoelectric Pyrometers; Automatic Compensation for Variations in Temperature of— <i>Wm. H. Bristol</i> | 339 |
| Cold-Headed Bolts—Their Metallography and Heat Treatment— <i>V. E. Hillman</i> | 369 |
| Discussion | 574 |
| Commercial Steels used for Carburizing; Comparison of Rate of Carbon Penetration in— <i>S. C. Spalding</i> | 950 |
| Comparison of Rate of Carbon Penetration in Commercial Steels used for Carburiz- ing— <i>S. C. Spalding</i> | 950 |

| | |
|---|------|
| Cost; High Cost of Carbonizing— <i>T. G. Selleck</i> | 1219 |
| Cutlery of Stainless Steel— <i>R. G. Hall</i> | 561 |
| Discussion | 566 |
| Cyanamide in Liquid Case-Hardening— <i>P. W. Shimer and E. B. Shimer</i> | 403 |
| Cyanide Hardening; Efficiency of Different Mixtures for Cyanide Hardening and the Role of Nitrogen in the Process— <i>V. E. Hillman</i> | 296 |

D

| | |
|--|------|
| Decarburizing; Carburizing and in Case Hardening— <i>H. B. Knowlton</i> | 1155 |
| Determination of Heat Treating Costs— <i>H. F. Wood</i> | 710 |
| Dies; Local Hardening of— <i>E. H. Barker</i> | 1039 |
| Discussion of Hardening of Steel and Other Alloys— <i>O. E. Harder</i> | 139 |
| Discussion of Impact Testing Methods and Results Obtained— <i>J. M. Lessells</i> | 659 |
| Discussion | 876 |
| Discussion of the Research Session..... | 98 |
| Do Alloy Carbonizing Boxes Pay?— <i>C. M. Campbell</i> | 495 |
| Dowmetal and Its Application— <i>J. A. Gann</i> | 607 |
| Drop Forging; Perfecting of— <i>J. H. G. Williams</i> | 391 |
| Discussion | 579 |

E

| | |
|---|------|
| Early Discovery of the Recalescence Point in Heating Steel..... | 465 |
| Effect of Heat Treatment on the Mechanical Properties of One Per Cent Carbon Steel— <i>H. J. French and W. G. Johnson</i> | 467 |
| Effect of Heat Treatment on Mechanical Properties of a Carbon-Molybdenum and a Chromium-Molybdenum Steel— <i>H. J. French</i> | 769 |
| Effect of Structure upon the Machining of Tool Steel— <i>J. V. Emmons</i> | 1100 |
| Effect of Tungsten Content on the Specific Gravity of High-Speed Steel— <i>A. S. Townsend</i> | 133 |
| Efficacy of Annealing Overstrained Steel— <i>I. H. Cowdrey</i> | 802 |
| Efficiency of Different Mixtures for Cyanide Hardening and the Role of Nitrogen in the Process— <i>V. E. Hillman</i> | 296 |
| Efficiency of Various Quenching Mediums with Their Practice and Applications— <i>J. B. Morey</i> | 63 |
| Elastic Limit; High Elastic Limit of Some Alloy Steels, Their Heat Treatment and Microstructure— <i>C. M. Johnson</i> | 501 |
| Electric Furnace as It Effects Over-All Cost of Heat Treated Parts— <i>C. L. Ipsen</i> .. | 984 |
| Electrically Heated Forging and Heat Treating Furnace— <i>G. M. Little</i> | 228 |
| Electricity; Heat Treatment of Large Forgings by Oil, Gas and— <i>W. E. McGahey</i> | 799 |
| Engine; Study of Some Failures in Aircraft Plane and Engine Parts— <i>J. B. Johnson and S. Daniels</i> | 1167 |
| Exhibition; Many Companies Display Products and Equipment at Indianapolis.... | 27 |
| Extruding Dies; Local Hardening of— <i>E. H. Barker</i> | 1039 |

F

| | |
|--|------|
| Factors Influencing Mass Heat Treatment— <i>W. B. Crowe</i> | 869 |
| Discussion | 874 |
| Failure; Cause of Failure not always due to Heat Treatment— <i>C. A. Brooks</i> | 72 |
| Failures; Study of Some Failures in Aircraft Plane and Engine Parts— <i>J. B. Johnson and S. Daniels</i> | 1167 |
| Fatigue of Metals under Stress; Investigation of— <i>H. F. Moore</i> | 70 |
| Fatigue of Metals under Repeated Stress— <i>H. F. Moore and J. B. Kommers</i> | 305 |
| Discussion | 812 |
| Fiber in Iron and Steel— <i>F. F. McIntosh</i> | 856 |
| Discussion | 864 |
| Field of Research in Industry— <i>E. P. Hyde</i> | 223 |
| Forging; an Electrically Heated Forging and Heat Treating Furnace— <i>G. M. Little</i> | 228 |

| | | |
|-----|--|------|
| 219 | Forging; Perfecting a Drop Forging— <i>J. H. G. Williams</i> | 391 |
| 561 | Discussion | 579 |
| 566 | Forging and Heat Treating Work at the Watertown Arsenal—Planning and Rout- | |
| 403 | ing of— <i>F. C. Langenberg</i> | 763 |
| | Forgings Heat Treated by Oil, Gas and Electricity— <i>W. E. McGahey</i> | 799 |
| 296 | Fracture Test on Steel to Determine Its Quality— <i>W. J. Priestley</i> | 620 |
| | Fuel; the Future Fuel for the Heat Treating of Steel— <i>H. O. Loebell</i> | 240 |
| 155 | Furnace Atmospheres and Their Relation to the Formation of Scale— <i>G. C. Mc-</i> | |
| 710 | <i>Cormick</i> | 1006 |
| 039 | Furnace; Electric Furnace as It Affects Over-All Cost of Heat Treated Parts— | |
| 139 | <i>C. L. Ipsen</i> | 984 |
| 659 | Furnace; Electrically Heated Forging and Heat Treating— <i>G. M. Little</i> | 228 |
| 876 | Furnaces; High Pressure Gas and Its Application to Industrial Furnaces— <i>F. J.</i> | |
| 98 | <i>Evans</i> | 213 |
| 495 | Future Fuel for the Heat Treatment of Steel— <i>H. O. Loebell</i> | 240 |

G

| | | |
|-----|--|-----|
| 391 | Gas; Heat Treatment of Large Forgings by Oil, Gas and Electricity— <i>W. E.</i> | |
| 579 | <i>McGahey</i> | 799 |
| | Gas; High Pressure Gas and Its Application to Industrial Furnaces— <i>F. J. Evans</i> .. | 213 |
| 465 | Gears; Reclaiming High Carbon Gears— <i>R. L. Dowdell</i> | 320 |
| 467 | Ghost-Lines and Grain Elongations in Hot Rolled and Cold Drawn Low Carbon | |
| | Steel Wire— <i>N. B. Hoffman</i> | 516 |
| 769 | Government Laboratory and Industrial Research— <i>G. K. Burgess</i> | 91 |
| 100 | Grain Elongations and Ghost-Lines in Hot Rolled and Cold Drawn Low Carbon | |
| | Steel Wire— <i>N. B. Hoffman</i> | 516 |

H

| | | |
|-----|---|------|
| 133 | Hardened; Small Case-Hardened Chain; Magnetic Testing of— <i>A. V. de Forest</i> | 387 |
| 802 | Discussion | 582 |
| 96 | Hardening; Case Hardening— <i>A. H. d'Arcambal</i> | 1111 |
| 63 | Hardening; Cyanamide in Liquid Case-Hardening— <i>P. W. Shimer and E. B.</i> | |
| | <i>Shimer</i> | 403 |
| 01 | Hardening; Cyanide Hardening—Efficiency of Different Mixtures for Cyanide | |
| 84 | Hardening and the Role of Nitrogen in the Process— <i>V. E. Hillman</i> | 296 |
| 28 | Hardening of Extruding Dies; Local— <i>E. H. Barker</i> | 1039 |
| 99 | Hardening Range; Properties of Some Steels in the— <i>W. R. Chapin</i> | 507 |
| 67 | Discussion | 514 |
| 27 | Hardening of Steel and Other Alloys, Discussion of— <i>O. E. Harder</i> | 139 |
| 39 | Hardness; Some Brinell Hardness Measurements on Small Specimens— <i>E. D.</i> | |
| | <i>Campbell</i> | 269 |
| 69 | Hardness; Testing of Metals for— <i>S. P. Rockwell</i> | 1013 |
| 74 | Heat-Resisting Alloy—Calite— <i>G. R. Brophy</i> | 384 |
| 72 | Discussion | 569 |
| 67 | Heat Treatment of Steel Castings— <i>W. H. White</i> | 437 |
| 70 | Heat Treated Parts; Electric Furnace as It Affects Over-All Cost of— <i>C. L. Ipsen</i> | 984 |
| 05 | Heat Treating; A Successful Bonus System Applied to— <i>A. A. Blue</i> | 430 |
| 12 | Heat Treating and Coiling Plant for Helical Springs— <i>W. J. Merten</i> | 977 |
| 56 | Heat Treating Costs; Determination of— <i>H. F. Wood</i> | 710 |
| 64 | Heat Treating Furnace; Electrically Heated Forging and Heat-Treating Furnace— | |
| 23 | <i>G. M. Little</i> | 228 |
| 28 | Heat Treating in Lead— <i>R. B. Schenck</i> | 1203 |
| | Heat Treating of Steel; Future Fuel for— <i>H. O. Loebell</i> | 240 |
| | Heat Treatment; A Contribution to the Problem of the Influence of Mass in— | |
| | <i>E. J. Janitzky</i> | 55 |
| | Heat Treatment and Forging Work at the Watertown Arsenal—Planning and | |
| | Routing of— <i>F. C. Langenberg</i> | 763 |

| | |
|---|------|
| Heat Treatment and Metallography of Cold-Headed Bolts— <i>V. E. Hillman</i> | 369 |
| Discussion | 574 |
| Heat Treatment and Microstructure of Some Alloy Steels of High Elastic Limit— <i>C. M. Johnson</i> | 501 |
| Heat Treatment; Factors Influencing Mass Heat Treatment— <i>W. B. Crowe</i> | 869 |
| Discussion | 874 |
| Heat Treatment; Its Effect on Mechanical Properties of a Carbon-Molybdenum and a Chromium-Molybdenum Steel— <i>H. J. French</i> | 769 |
| Heat Treatment; Its Influence upon the Magnetic Properties of Steel— <i>L. W. Wild</i> | 696 |
| Heat Treatment of Chrome Steel for Ball Bearings— <i>Haakon Styri</i> | 718 |
| Heat Treatment of Large Forgings by Oil, Gas and Electricity— <i>W. E. McGahey</i> .. | 799 |
| Heat Treatment of Steel for Ordnance Purposes— <i>H. F. Leary</i> | 288 |
| Heat Treatment; New Development on the Influence of Mass in— <i>E. J. Janitzky</i> | 377 |
| Comments | 396 |
| Discussion | 580 |
| Heat Treatment not Always the Cause of Failure— <i>C. A. Brooks</i> | 72 |
| Heat Treatment on the Mechanical Properties of One Per Cent Carbon Steel; Effect of— <i>H. J. French and W. G. Johnson</i> | 467 |
| Heat Treatment; Change in Dimensions of High-Speed Steels in— <i>M. A. Grossmann</i> | 691 |
| Discussion | 890 |
| Heat Treatment; Toughness of High-Speed Steels as Effected by Their Heat Treatment— <i>M. A. Grossmann</i> | 1001 |
| Heating and Cooling of Steel; Importance of Proper— <i>J. A. Succop</i> | 673 |
| Discussion | 888 |
| Heating Medium; Its Influence on the Structural Changes in Steel— <i>A. E. Bellis</i> .. | 398 |
| Heating Steel; Early Discovery of the Recalescence Point in..... | 465 |
| Heavy Sections; Carburizing of— <i>W. I. McInerney</i> | 237 |
| Helical Springs; A Coiling and Heat Treating Plant for— <i>W. J. Merten</i> | 977 |
| High Cost of Carbonizing— <i>T. G. Selleck</i> | 1219 |
| High Pressure Gas and Its Application to Industrial Furnaces— <i>F. J. Evans</i> | 213 |
| High-Speed Steel, Effect of Tungsten Content on the Specific Gravity of— <i>A. S. Townsend</i> | 133 |
| High-Speed Steel; Lathe Breakdown Tests of Some Modern High-Speed Tool Steels— <i>H. J. French and Jerome Strauss</i> | 1125 |
| High-Speed Steel; Metallography of— <i>J. P. Gill and L. D. Bowman</i> | 184 |
| High-Speed Steels in Heat Treatment—Change in Dimensions of— <i>M. A. Grossmann</i> | 691 |
| Discussion | 890 |
| High-Speed Steels; Physical Tests on— <i>A. H. d'Arcambal</i> | 586 |
| High-Speed Steels; Toughness of—as Affected by Their Heat Treatment— <i>M. A. Grossmann</i> | 1001 |
| High Temperatures; Tensile Properties of Some Structural Alloy Steels at— <i>H. J. French</i> | 409 |
| Honor French Scientist and Inventor..... | 267 |
| Honorary Membership; Dr. John A. Mathews Elected to..... | 83 |
| Honorary Membership; Elwood Haynes Elected to..... | 167 |
| Honorary Membership; Henry Le Chatelier Elected to..... | 1096 |
| Hot Rolled and Cold Drawn Low Carbon Steel Wire, Ghost-Lines and Grain Elongation in— <i>N. B. Hoffman</i> | 516 |

I

| | |
|--|-----|
| Impact Testing Methods and Results Obtained— <i>J. M. Lessells</i> | 659 |
| Discussion | 876 |
| Importance of Proper Heating and Cooling of Steel— <i>J. A. Succop</i> | 673 |
| Discussion | 888 |

| | |
|--|------|
| Indianapolis Convention; Sets New Record in Attendance and Number of Papers Presented at | 3 |
| Indianapolis Convention; Abstracts of Papers Presented at..... | 33 |
| Indianapolis Exhibition; Many Companies Display Products and Equipment at..... | 27 |
| Industrial Furnaces; High Pressure Gas and Its Application to— <i>F. J. Evans</i> | 213 |
| Industrial Research and Government Laboratory— <i>G. K. Burgess</i> | 91 |
| Industry and University— <i>A. E. White</i> | 85 |
| Industry; Relation of the University to— <i>J. G. Bowman</i> | 896 |
| Industry; The Field of Research in— <i>E. P. Hyde</i> | 223 |
| Influence of Heat Treatment upon Magnetic Properties of Steel— <i>L. W. Wild</i> | 696 |
| Discussion | 918 |
| Influence of the Heating Medium on Structural Changes in Steel— <i>A. E. Bellis</i> | 398 |
| Investigation of Fatigue of Metals under Stress— <i>H. F. Moore</i> | 70 |
| Iron; Fiber in Iron and Steel— <i>F. F. McIntosh</i> | 856 |
| Discussion | 864 |
| Iron; The Manufacture and Properties of Wrought Iron— <i>J. P. Baldwin</i> | 1034 |
| Irregularities in Case Hardened Work Caused by Improperly Made Steel— <i>E. W. Ehn</i> | 1177 |

L

| | |
|---|------|
| Laboratory; Government Laboratory and Industrial Research— <i>G. K. Burgess</i> | 91 |
| Lathe Breakdown Tests of Some Modern High-Speed Tool Steels— <i>H. J. French and Jerome Strauss</i> | 1125 |
| Lead; Heat Treating in— <i>R. B. Schenck</i> | 1203 |
| Liquid Case-Hardening; Cyanamide in— <i>P. W. Shimer and E. B. Shimer</i> | 403 |
| List of Authors and Pages on Which the Abstracts of Their Papers Appear..... | 32 |
| Local Hardening of Extruding Dies— <i>E. H. Barker</i> | 1039 |

M

| | |
|---|------|
| Machining; Effect of Structure upon the Machining of Tool Steel— <i>J. V. Emmons</i> | 1100 |
| Magnetic Properties of Steel; Influence of Heat Treatment upon— <i>L. W. Wild</i> | 696 |
| Magnetic Testing of Small Case-Hardened Chain— <i>A. V. de Forest</i> | 387 |
